In addition, the area of systems programming has developed to support the three groups above. Systems programming is the study of writing computer programs that help others write computer programs. 0A.2.1 Python. In this course, we will write programs in the language, Python. Python is a young language, but it draws upon decades of programming-design experience.

Introduction to Computing

Programming languages help us write programs for all the uses of computers stated above. These uses fall roughly into three groups: scientific and mathematical calculations, such as calculating the roots of a quadratic equation, drawing the curve for a polynomial, or matching sequences of genetic data against patterns of known genes.

Earn Your Stars Mapping dreams of the future

When you were in grade six, what did you imagine the future would be? Fresh! A Map of a Dream of a Future (Fresh) was an ambitious two and a half year long collaboration by Tasmanian Regional Arts and the University of Tasmania to engage young people, academics and the arts community to develop a positive vision for addressing climate change issues in the future.

wxPerl past wxPerl present and wxPerl future

wxPerl past, wxPerl present and wxPerl future. Hi Guys, I've been using wxPerl as my main development tool for the last 4 years. During that time my partners and I have developed a medical system for endoscopic examinations. We are currently testing it here in Brazil in the largest hospital in Central and South America.
